Work Experience

Leafwell – Senior Software Engineer

2021/Today

- Contributed to the core product, focusing on maintaining and developing features to ensure a seamless user experience for customers and a quick delivery of the business needs.
- Planned and wrote the API in Ruby on Rails for the core product.
- Made part of the platform migration to the new version using React and GraphQL.
- Wrote unit and end-to-end tests using Rspec, Vitest and Cypress.

Minuscode – Software Engineer

2017/2021

- Developed a gym streaming platform, in Ruby on Rails, tailored for personal trainers, enabling them to host live classes and provide a seamless experience for remote clients. Engineered the platform's core features, including live video streaming, user management, and interactive class scheduling, ensuring scalability and high performance.
- Built and customized client-facing websites linked with WordPress CMS.

Hypatia - Junior Software Engineer

2015

- Developed C# Scripts for an Augmented Reality project in Unity3D.
- Contributed to several Android apps using Java,
